### Comments

Meeting program was very good as were all the presenters.	Great Venue, Easy Access, Very pleased with the food, Overall everything went well. I always pickup some new knowledge, as they say you never stop learning.	
The seating arrangement was superior than other formats. Seats are closer to speakers and screens as well as more seating in front row.		
Load calculation program was way too long. Could have been done in one hour. Food was very good. Meeting room too small. Awards to Mel well done and well deserved!		
It would be nice if we could get credit for classes that take place on just Thursday or Friday, instead of having to be there both days to receive credit.	The seminar on health care facilities was very interesting.	
I would like to see the state chief electrical inspector take questions. Great event!	All programs were very useful and informative. I felt the EV Calculations could be shortened. 4 hours seemed a bit long.	
I found all the programs informative, though it seemed the EV calculations portion was geared more toward contractors rather than inspectors. Helpful for plan review , though 2 hours would have been sufficient. Would like to see more on chapter 5		
I am a very new inspector. I have been a contractor for a while. When I go to these classes, I would like information about current codes, not something that is coming in 2020/2023.		
The Guest program attracts members who might otherwise not attend, it gives Guests a chance to understand better how IAEI operates, and it "builds our brand"	Loved the program on the changes for 2020.	
Every thing was good, all speakers did a good job and were knowledgeable about their topic. Food and facilities were great as well	All the speakers do a great job. Looking forward to the next meeting. Thank you.	
Had a great time as usual. Very informative and professional.	Great Meeting and well organized.	Great to see everyone! Thanks for the program!
Food was "ok" not great. We were packed in pretty tight and I would not recommend this facility in the future		Well done and hotel staff was on it
Not enough room in the presentation room. We were jammed in and it made getting in and out of our chairs difficult.		Other than the small meeting room it was great
The facilities were adequate, we are there for technical information	The meeting room was a little crowded. Also, the restaurant options were a little pricey. The facility was nice though, and the rooms were clean and the beds were comfortable	
Must have larger meeting room and we'll as a separate room to eat	Rooms and hallway very dirty, and staff didn't seem helpful.	Other than the small meeting room it was great
I realize it must be difficult picking out venues but having enough room to egress is important.		
Very good both days	(5) Too small of a meeting room	Great staff
For me, the facility was perfect in size and location. Great choice!	Better than shanty creek by far	Facility was fine space was just a little cramped.
The meeting room was a little crowded. Also, the restaurant options were a little pricey. The facility was nice though, and the rooms were clean and the beds were comfortable

### Programs you would like to see

(4) Grounding and Bonding	(5) Solar and Renewables	(4) Plan Review
(2) Generators	(2) Alternative Energy	(2) Swimming Pools & Ponds
(2) Fire Alarm Installations	(2) Hazardous Locations	(2) 2020 Code Update Class
POE - Power Over Ethernet	Residential Solar Inspections	Wind turbines
Marinas and Docks	Large scale solar	Services
Tips for proper/thorough electrical inspections	Distributed antenna systems	Switchgear GFP Calibration and documentation
Energy Storage Systems	Technical and Specialty	Motor Conductor sizing and OCPD's
Specific for fuel dispensing and LP gas	Consumers Energy and DTE Requirements	Plan review, Especially plan review on solar installations

### What Can We Do Better

Things went well	I think the Michigan chapter dose a great job. I wish I had room in my schedule to help out. But just don't have any time to spare.	
Provide more education be it webinars or in person	More continuing education hours	Have more inspector school meetings.
Promote more contractors for membership / send out mailer	I was very impressed with the Organizations structure!	I think Michigan Chapter is doing a great job.
